

Guidelines for Authorization and Use of Standard State Vehicles By Classification

BUSES

Buses capable of seating more than 15 passengers to include modified buses where the capacity has been reduced to accommodate the mission of the program (e.g. wheelchair lifts, etc).

AIRCRAFT

Airplanes and helicopters including those designed to alight on water, and the associated ground support equipment (e.g. tugs, tow bars, auxiliary power units, etc.)

WATERCRAFT

All types of boats regardless of power source (sail, inboard, outboard, paddles, oars, etc.), boat trailers or other equipment (except sedans, LTVs or trucks) used to transport the watercraft over land, and all types of outboard motors including electric.

RAIL VEHICLES

Any vehicle designed to operate on the rail system to include engines, subway cars, passenger cars, and all types of railway cargo carriers or rolling stock.

MISCELLANEOUS/OTHER

Any vehicle not covered by one of the other categories including motorcycles, all terrain vehicles, snowmobiles, road graders, farm tractors, riding mowers, trailer mounted motor-generator sets and/or air compressors, portable office trailer, motor homes, cargo trailers, equipment haulers, back hoes, trenchers, and other motorized equipment whose primary purpose is not to transport persons or personal effects.
